

Website Software Administration

Once an order is placed you will receive it in your administrative site instantly. Our system was built to make the back-end shopping and delivery processes as efficient as possible. Since our company has experience in the grocery shopping and delivery business, we built the tools and features we know are important and necessary to operate efficiently and flawlessly. Every function on the administrative site is easy to use and can be learned in less than an hour. We built an expansible system so companies can grow to multiple locations with ease --- this meant making the system easy to learn and easy to train people to use. We think you'll find the admin site is quite user friendly and offers all the functionality you'll need to run and grow your business. Below you will find several screenshots detailing the basic delivery process using our admin.

Main Admin Page

Here is the main administrative screen you see once you log in. The admin site is secure and requires a username and password to log in --- we also offer the ability to setup security levels; where managers, drivers, and shoppers have access to different parts of the admin.

Individual Order Page

Getting to your delivery schedule is only a click away. Once you choose the date for your delivery schedule, you can print out a list of the entire schedule. From this list you can also view orders individually and print receipts for each order.

Everything follows a simple plan that allows preparing for 10 or more orders in a day to be done in less than 5 minutes.
